

# Lomandra Katie Belles™

EVERGREEN \* BROAD FOLIAGE \* SHOWY FRAGRANT FLOWERS

Lomandra hystrix 'LHBYF' Katie Belles™

**General:** A large evergreen grass-like perennial with bright green to lime-green foliage with showy flower spikes in late spring which bear loads of fragrant yellow florets.

**Form & Habit:**

- 4.5' H x 4.5' W (+/-); arched to weeping habit
- Tightly clumping crown creates a dense tussock
- Zones 8b-11; confidently evergreen in Zone 9. Mediterranean to subtropical climates.

**Leaf & Bloom:**

- Broad, linear foliage with a bright yellow-green color in full sun and dark green in shade
- Branched inflorescences, held within and beyond the foliage, bearing loads of yellow, fragrant florets in late spring.

**Notes:**

- Plant in filtered sun to moderately heavy shade
- Prefers free draining soils
- Should not require annual pruning
- Slower to mature than some other Lomandra
