

Grevillea Crimsonvillea™

COMPACT & DENSELY FOLIAGED * LOADS OF CERISE FLOWERS

Grevillea rosmarinifolia 'H16' Crimsonvillea™ PP27,469

General: A seedling selection of G. 'Scarlet Sprite', selected for its dense, compact habit and loads of bright rose red to cerise-pink flowers that peak from late winter to spring.

Form & Habit:

- 36" H x 36" W (+/-); rotund plant shape
- Freely branching, densely foliated perennial
- Zones 9 -11; arid to Mediterranean climates; plant in a protected area in colder climates.

Leaf & Bloom:

- Narrow linear foliage; glossy; dark green upper surface with a silvered underside
- Bright rose red to cerise-pink flowers with prominent exerted stamens, born all along the length of the branches

Notes:

- Plant in full sun to partial shade; free-draining soils
- Prune in spring, after flowering
- Deer resistant & drought tolerant
