

Hardenbergia Mini Meema™

COMPACT SHRUB * NATURALLY BALL-SHAPED

Hardenbergia violacea 'HB2' Mini Meema™ PP28,682

General: Mini Meema exhibits a very compact, ball-shaped growth habit; densely foliated with masses of violet flowers in late winter.

Form & Habit:

- 1.5 ft H x 1.5 ft W (+/-); compact, ball-shaped
- Moderately fast growing
- USDA Hardiness Zones 9 -11

Leaf & Bloom:

- Small elliptical evergreen leaves; emerald green with a leathery texture
- Deep violet "pea" flowers with clustered into terminal inflorescence that appear in great numbers from late winter to early spring.

Notes:

- Shrubby habit negates the need for staking
- The most compact Hardenbergia available
- Heat & drought tolerant
