

Lomandra Pacific Sky™

BLUE-GREEN FOLIAGE * FINE TEXTURED * FRAGRANT

Lomandra confertifolia 'LM700' Pacific Sky™ PPAF

General: A small, compact Lomandra with very fine foliage with a nice blue-green to greyed-green color. Loaded with fragrant yellow-orange flower spikes in spring.

Form & Habit:

- 1.5' H x 2' W (+/-); arched to weeping habit
- Tightly clumping crown creates a dense tussock
- Zones 9 -11; arid to Mediterranean climates; plant in a protected area in colder climates.

Leaf & Bloom:

- Narrow linear foliage with a blue-green color
- An abundance of yellow-orange spike inflorescences appear in late spring. Flowers are sweetly perfumed.

Notes:

- Plant in full sun to moderately heavy shade
- Prefers free-draining amended soils; ideal choice for waterwise containers
- Should not require annual pruning
