

Lomandra Shara™

COMPACT * BLUE-GREEN FOLIAGE * FINE TEXTURED

Lomandra fluviatilis 'AU807' Shara™ PP23,950

General: A compact Lomandra that is smaller than Lomandra Breeze™ with slightly finer foliage and a nice blue-green color. Drought tolerant but can handle periodic wet feet.

Form & Habit:

- 1.5' H x 2' W (+/-); arched to weeping habit
- Tightly clumping crown creates a dense tussock
- Zones 9 -11; arid to subtropical climates; plant in a protected area in colder climates.

Leaf & Bloom:

- Narrow linear foliage with a blue-green color
- An abundance of weeping spike-like inflorescences with small yellow-orange flowers appear in late spring.

Notes:

- Plant in full sun to moderately heavy shade
- Prefers free draining soils but will tolerate periodic wet feet
- Should not require annual pruning
