

Lomandra Wingarra™

EVERGREEN * VERY FINE TEXTURED * BLUE-GREEN FOLIAGE

Lomandra confertifolia 'SIR5' Wingarra™ PP19,049

General: A very fine-leaved Lomandra with green to greyed-green to blue-green foliage with purple sheaths accenting the plant base.

Form & Habit:

- 16-20" H x 20-24" W (+/-); weeping habit
- Tightly clumping crown creates a dense tussock
- Zones 9 -11; arid to subtropical climates; plant in a protected area in colder climates.

Leaf & Bloom:

- Narrow linear foliage with a blue-green color
- An abundance of spike-like inflorescences with small yellow-orange flowers appear in late spring. Spikes stay below the foliar plane

Notes:

- Plant in filtered sun to moderately heavy shade
- Prefers free draining soils
- Should not require annual pruning
