

# Grevillea Down Under™

LOW-GROWING GROUNDCOVER \* UNIQUE FLOWERS

Grevillea laurifolia 'TWD02' Down Under™ PP29,474

**General:** A very low-growing and fast spreading Grevillea with second racemes of dark red-purple florets and bright red exserted stamens from late winter to spring.

**Form & Habit:**

- 1' H x 10' W (+/-); prostrate groundcover
- Freely branching, densely foliated perennial
- Zones 9 -11; arid to Mediterranean climates; plant in a protected area in colder climates.

**Leaf & Bloom:**

- Dark green mature foliage and bronzed juvenile foliage; red immature branches
- Dark red-purple florets with bright red exserted stamens, born in second racemes

**Notes:**

- Plant in full to filtered sunlight; free-draining soils
- Responds well to pruning
