

Lomandra Lady Breeze™

DARK EMERALD GREEN COLOR * COMPACT * FINE, SOFT FOLIAGE

Lomandra sp. 'LM360' Lady Breeze™ PPAF

General: A compact, disease-resistant Lomandra, with clean, cascading, dark emerald green foliage that is soft to the touch. Small yellow flower spikes from late spring into early summer.

Form & Habit:

- 2' H x 2-2.5' W (+/-); arched to weeping habit
- Tightly clumping crown creates a dense tussock
- Zones 8 -11; arid to subtropical climates; plant in a protected area in colder climates.

Leaf & Bloom:

- Narrow linear foliage with a deep green color
- An abundance of spike-like inflorescences with small yellow-orange flowers appear in late spring. Spikes stay below the foliar plane

Notes:

- Plant in filtered sun to moderately heavy shade
- Prefers free draining soils
- Should not require annual pruning
